

PROFILE

AVAR EDUPLANET

Avar EduPlanet is an international learning platform that equips students with academic depth, real-world skills, and clear pathways to global opportunities.

WHO WE ARE

Avar EduPlanet was founded by students and educators who have experienced international academic competitions, research programs, and global classrooms firsthand. We understand the gap between traditional school learning and what top universities, competitions, and modern careers actually demand. Our work focuses on building structured, age-appropriate pathways that develop 21st-century skills—critical thinking, communication, creativity, collaboration, digital literacy, and ethical use of technology—while remaining accessible to students across different countries and education systems.

CREATE
FOR A BETTER TOMORROW**

OUR MISSION AND VISION

Mission: In the 21st century, children are nurtured to develop the necessary knowledge, skills, and attitudes to be competent and to appreciate the cultures and traditions of all other peoples, both nationally and globally.

Vision: We aim to help students grow into confident learners and responsible global citizens by providing access to meaningful education beyond the classroom for the 21st century and beyond.

WHAT WE DO

We design hands-on learning experiences that connect academic knowledge with real-world skills. Our work includes school-based robotics and technology clubs, structured World Scholar's Cup tutoring, and 21st-century skills programs such as 4C+T, focusing on critical thinking, collaboration, communication, creativity, and technology. We also create interactive learning resources and collaborate with youth and education organizations, including ASEAN-based partners such as AYO.

**EMPOWERING
YOUTH'S
FUTURE THROUGH
EDUCATION**

WHY CHOOSE US

- 01** We prioritize transferable skills such as reasoning, research, writing, problem-solving, and communication, ensuring students are prepared not just for exams, but for university study and real-world challenges.
- 02** Our programs align with international academic expectations while remaining flexible and accessible to students from diverse educational systems and backgrounds.
- 03** We offer structured guidance, from learning resources to competitions and enrichment opportunities helping students and parents navigate global academic options with clarity and confidence.

**TRANSFORMING
CONCEPTS
INTO REALITY
AND
NURTURING
INNOVATION**

OUR OFFERINGS

- 01 STEM & Technology**

Project-based learning in computer science, artificial intelligence, mathematics, and emerging technologies, designed to build both conceptual understanding and practical problem-solving skills.
- 02 PPE & Global Studies**

Courses and resources in politics, philosophy, economics, and international affairs that help students analyze real-world issues, form arguments, and think independently.
- 03 Competitions & Extracurriculars**

Structured preparation and mentorship for Model United Nations, World Scholar's Cup, and the John Locke Essay Competition, focusing on research, writing, speaking, and strategy rather than memorization.
- 04 Directories & Academic Pathways**

Curated guides to competitions, programs, scholarships, reading lists, and opportunities that help students and parents navigate international academic ecosystems with clarity.
- 05 EduPlanet Library**

A growing digital library of articles, study guides, reading summaries, and learning resources designed for independent learners and classroom use.

LEARN SKILLS THAT TRAVEL BEYOND THE CLASSROOM.
